

WEBSITE DESIGN PROPOSAL

your new website

a custom, modern website designed to help your patients
find you, trust you, and book with you.

WHAT'S INCLUDED

everything you need to get online

a complete website built around your brand, your patients, and how they find you.

Custom Design

built from scratch to match your brand colors, logo, and style. no templates — this is 100% yours.

Mobile Responsive

looks beautiful on phones, tablets, and desktops. over 60% of patients will find you on their phone first.

Appointment Scheduling

built-in contact form with service selection so patients can request appointments directly from your site.

SEO Foundation

meta titles, descriptions, and structure optimized so you show up when people search for audiologists in your area.

Services & FAQ

clear service pages and FAQ section so patients understand what you offer before they even call.

Patient Testimonials

a dedicated section to showcase reviews and build trust with new patients researching you online.

built for your patients

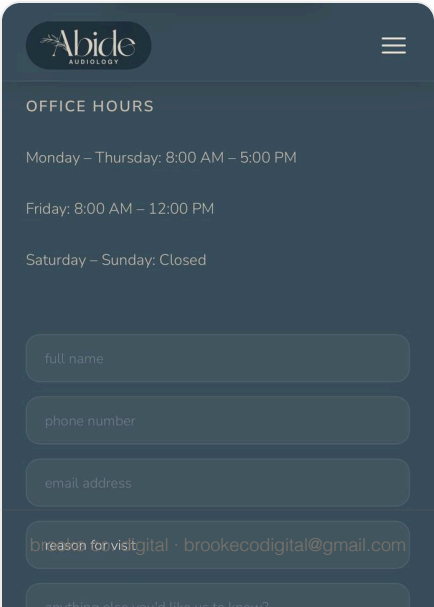

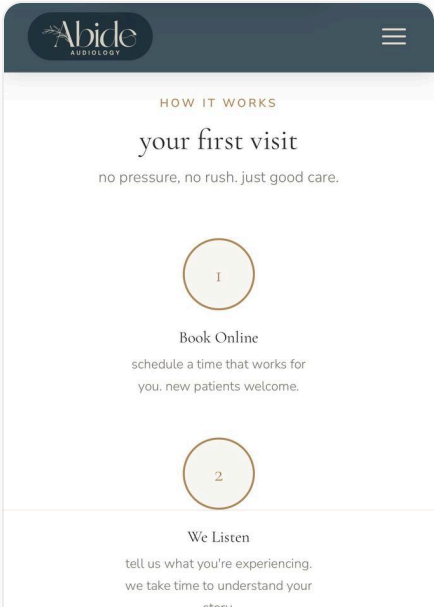

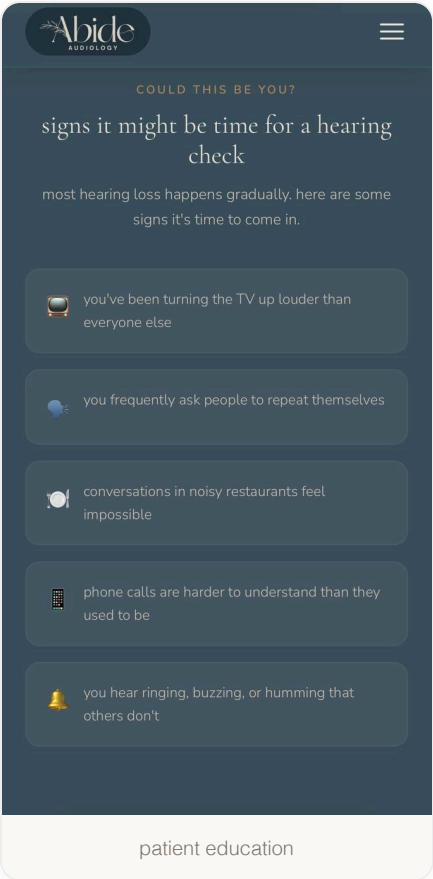

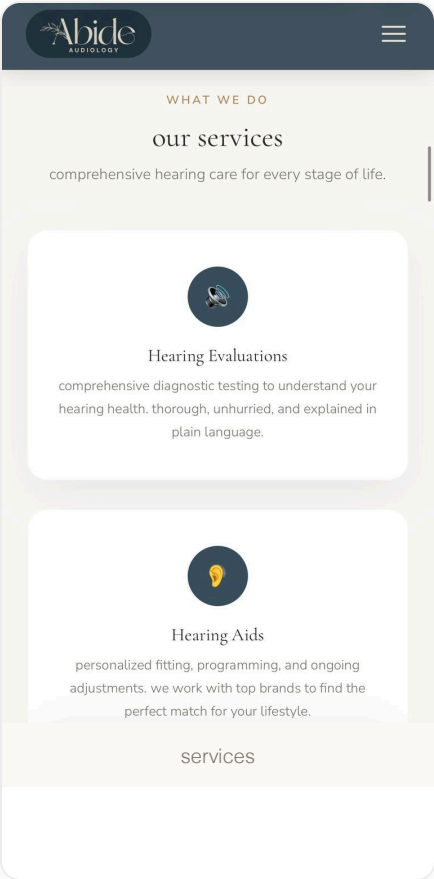

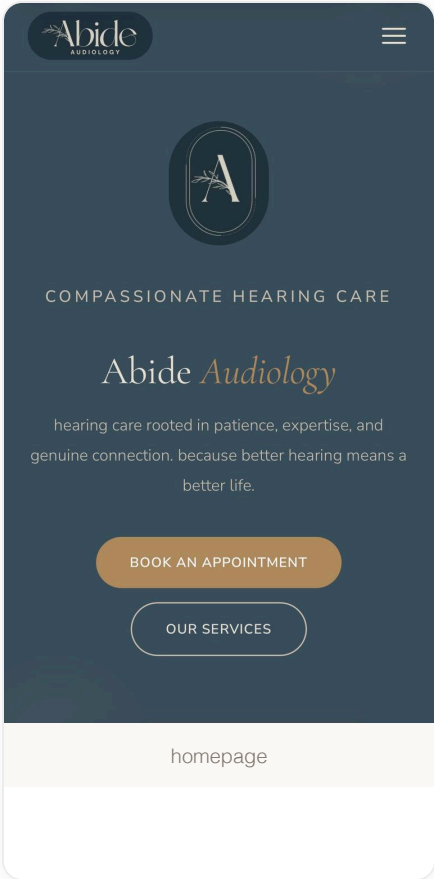

audiology patients are often nervous, overwhelmed, or putting off care. your website should feel warm, trustworthy, and easy to navigate — not clinical or complicated. every design decision is made with your patient's experience in mind.

PREVIEW

here's what it looks like

a live preview has been built using your logo, colors, and branding.

Online Scheduling Platform

integration with a booking system (like Calendly, Acuity, or Jane) so patients can book appointments directly — just like a salon booking system.

+ \$75

Google Business Profile Setup

get your practice showing up in Google Maps and local search results.

+ \$75

Blog / Educational Content

4 SEO blog posts about hearing health to drive organic traffic to your site.

+ \$100

Monthly Maintenance

ongoing updates, content changes, and support. just text me whenever you need something.

\$50/month

LET'S GET STARTED

next steps

here's what happens after you say yes.

1

Quick Kickoff Chat

we'll hop on a 15-minute call or text back and forth. i'll learn about your practice, your patients, and anything specific you want on the site. if you already have a domain, great — if not, i'll help you pick one.

2

I Build Your Site

i handle everything — design, copy, layout, mobile optimization. you've already seen the preview, so we have a head start. i'll refine it based on our conversation and send you a draft to review.

3

Your Feedback

you review the draft and tell me what you love and what you'd change. we go back and forth until it feels exactly right. two rounds of revisions are included.

4

Go Live

once you're happy, we connect your domain, publish the site, and you're live. i'll walk you through how to make basic updates yourself, and i'm always just a text away if you need help.
