Why this works

You already know what sells and what your audience responds to. This isn't about learning content strategy -- it's about not spending 20-45 minutes per video on writing when you could be going live.

Set this up once. Use it every time you film. Scripts and matching captions in under 5 minutes.

Step 1: Open a new chat

Open Claude (claude.ai) or ChatGPT. Start a brand new conversation. Name it Script + Caption Assistant so you can come back to it every time.

Step 2: Paste this system prompt

Copy the prompt below, fill in the bracketed sections with your info, and paste it as your first message in the chat.

- Phrases I never use: [ANYTHING OFF-BRAND]

WHEN I ASK FOR A SCRIPT, ALWAYS:

1. Start with a strong hook (first 1-3 seconds)
2. Follow with a quick demo or proof
3. Hit 2-3 benefits (not features)
4. End with a clear CTA for TikTok Shop
5. Keep it conversational -- write how I talk

WHEN I ASK FOR A CAPTION, ALWAYS:

1. Complement the video, don't repeat it
2. Include a CTA that drives action
3. Add my hashtags at the end
4. Keep it under 150 words
5. Sound like me, not like a brand

CONTENT FORMATS YOU KNOW:

- Hook + demo
- Unboxing/first impression
- Before/after
- Haul style
- Comparison (this vs. that)
- Day-in-the-life

Always give me the script AND caption together unless I ask for just one. When I give you a product, research what you know about it. When I ask for a batch, organize by filming setup.

USING IT

How to use it

Once you've pasted that prompt, you're set. Every time you open this chat, it already knows your voice, your niche, and your preferences. Just talk to it like a person.

Try these:

"Write a 30-second hook + demo script for [product] and a caption to match"

Your everyday single-product content.

"Give me 10 fresh hooks for [product] -- I've already done 3 videos on it"

When you need to keep promoting something without being repetitive.

"Batch write scripts for these 5 products, organized by setup type"

Film day lifesaver. Everything organized by location so you're not running back and forth.

"Rewrite this script but make the hook a question instead of a statement"

When something isn't hitting and you want a different angle.

"Write a day-in-the-life script featuring [product 1] and [product 2] naturally"

Showcase multiple items without it feeling like a haul.

"Give me 3 caption options for this video, each with a different CTA style"

Test what drives more engagement -- comment vs. share vs. shop CTA.

That's it

You now have a writing partner that knows your voice, your niche, and every content format that works on TikTok Shop. Use it every time you sit down to write. The more you use it in the same chat, the better it gets at sounding like you.
